

Title: The Shadow Clone of Area 51

Logo

Home Page Intro:

During the early days of COVID-19, the Naruto Run became popular. You want to know why? Because a random man decided one day that he was prepared to raid Area 51 in Nevada alongside many other Naruto Runners.

Have you ever felt that with this breach of Government Secretion, that there is another base somewhere just a bit outside of Nevada? A place that is secluded and has less popularity than most of the states of America? A place surrounded by mountains and waterfalls? Maybe Wyoming?

Many researchers have talked on there being an actual Area 52 but did they research where it could possibly be? With this research, you can understand where this all leads to an Area 52 being in Wyoming.

About Page Intro: Area 51 has had its moments of fame in the cases of unfulfilled raids alongside many other consipracies that viral around the World in relations to the United States. Back in 2020, a raid was put into motion but was stopped due to Govermental personell making sure that no one gets to see whats beyond the gates of Area 51.

Years later, videos and videos of the idea that Area 52 exists but no one that currated such research couldn't curate a possible location for the said classified Govermental base.

Area 52 consists of what Area 51 was known for but beyond aliens and secret weapons. Its here for chemicals and molecules harmful to man kind and they use a consist source of water to keep these chemicals and molecules alive.

Many do not thing of it but in a place where there is nothing but mountains and waterfalls, is a fortune for the expansion of these secret 'potions' that are being made by the government.

Memorial:

RIP Naruto Run

Although the series of Naruto has lasted very long bbut hardly used outside of the Anime community, it created a moment where many of different communities to ghet together and try to expose the government for continuously hiding things from the public, that includes their weaponry and aliens.

After the failed 2020 Raid, the iconic Naruto Run unfortunately simmered down, no long seen in memes, videos nor in person interaction and to this day, only Naruto Runs the way that he does.

Evidence:

Weirdness of Wyoming - [The 10 Weirdest And Strangest Things In Wyoming](#)

Wyoming being one of the least populated states in the United States of America, is seen as weird by many. Amongst the many states, nothing is as weird as a place that has a lot of moving room but a small amount of people to move around it, especially with the mountains, caves, endless waterfalls of such sorts.

States like Wyoming has momentous museums and giant items that are bigger than an entire human being just for the looks of it but nothing explains why those items are so big.

In my research, I ran across many sources concluding Wyoming's weirdness and this one link completes the theory as to why Wyoming is so Weird. For example, bones that looks like aliens.

Aliens? That rings a bell of what Area 52 'consists of'

Area 51 - [What is Area 51 and what goes on there?](#)

It is said that these marked areas of Nevada are testing zones, but no one has reported hearing anything in testing, noticing any sense of nuclear power wasting through the seems of the Nevada soil, or anyone besides the military to guard while testing it.

As there are many known military bases across America, the place where money is spent day in and day out on for gambles and aliens holds secrets and secluded areas where you see no one enter or no one exit consistently. And in consideration of it being in quite a popular spot any given time of the year, it isn't talked about, by the people, the press nor the president.

In my findings it is learned that these testing sights are to assist the militia in the time of war amongst many others but nothing is heard of about secret militia bases Internationally amongst the care of other presidents and their militia. Which furthers the secrets behind this sick truth.

Area 52 - [Area 52: Nevada's other secret base – Mystery Wire](#)

Area 51 is known, but no one actively speaks on Area 52 or have thought to conspiracies the being of aliens amongst the people, only the creation of war planes and weaponry.

Though its only a work in progress, thus research on Area 52 holds such a high manner as to why no one talks about it, no one has raided it, no one keeps an eye on it except conspiracists.

#### Recruitment Process:

I am gathering a group of people that would want to take professional raiding to the next level. The attempted Raid on Area 51 was concluded as a fail due to the indecisive although the theme was that not everyone would be caught in the process.

Donating or buying these memberships allow continuation of my research as well as early access to my book on Area 52 alongside of theories/conspiracies amongst the people of America. As well as getting us prepared for the items needed to make such a raid a success as a means to provide a bit of understanding for the people. We never know what the country's militia is doing until its time for war.

Product: A book that consists of Area 51 in comparison to Area 52 and all the medieties and possibilities that it is in Wyoming and not just another military base in Nevada.

Conclusion: With this current age and time, its time for us to expose the many secrets that have been kept from us for the longest. Without support and funds, this can't be a success but it would become another meme that would possibly probate behind another pandemic that would revive the Naruto Run or cause another Animated sensation to become more iconic than more meets the eye.
